Subject Index of Volume 57

Al–Cr alloys
deposition of metastable aluminium–chromium alloys by r.f. magnetron sputtering from mixed-powder targets, 179
Al–Si alloy
thermal-shock behaviour of plasma-sprayed Al_2O_3–13wt.%TiO_2 coatings on Al–Si alloy influenced by laser remelting, 169
Al–Sn thin films
structural evolution in codeposited Al–Sn thin films, 7
Aluminium
tensile properties of zinc coated aluminium, 203

Ball-ground craters
wear resistance determination of coatings from cross-section measurements of ball-ground craters, 151

Ceramics
improved wear resistance of ceramics through the use of coatings, 51
Chemical vapour deposition
chemically vapor deposited diamond as a cutting tool material—a study of failure mechanisms, 47
formation and tribological application of CVD diamond films on steels, 197
mass spectral analysis of CVD processes, 91
CO_2 lasers
CO_2 laser treatment of zinc-coated copper, 173
Computer-aided-design
magnetic fields in magnetron sputtering systems, 1
CrN coatings
fundamental properties and tribological wear behaviour of sputtered Cr–CrN coatings on light metals, 77
Cross-section measurements
wear resistance determination of coatings from cross-section measurements of ball-ground craters, 151

Diamond
chemically vapor deposited diamond as a cutting tool material—a study of failure mechanisms, 47
Diamond films
a comparison study of diamond films grown on tungsten carbide cobalt tool inserts with CH_4 and CF_4 gas sources, 155
formation and tribological application of CVD diamond films on steels, 197

Fe–Mn–Al–C alloys
laser surface melting of an austenitic Fe-26Mn-7Al-0.9C alloy, 139
Fracture strain
tensile properties of zinc coated aluminium, 203

Gaseous lubricants
action of gaseous lubricants in the orthogonal machining of an aluminium alloy by titanium nitride coated tools, 183

Hard carbon films
tribological characterization of hard carbon films prepared by Laser-Arc evaporation, 111
High current density
high plasma current density processes with different vapor sources, 133
High velocity oxy-fuel spraying
microstructure and hydroabrasive wear behaviour of high velocity oxy-fuel thermally sprayed WC–Co(Cr) coatings, 81
Hydroabrasive wear
microstructure and hydroabrasive wear behaviour of high velocity oxy-fuel thermally sprayed WC–Co(Cr) coatings, 81

Laser gas alloying
laser gas alloying of titanium alloy with nitrogen, 191
Laser remelting
thermal-shock behaviour of plasma-sprayed Al_2O_3–13wt.%TiO_2 coatings on Al–Si alloy influenced by laser remelting, 169
Laser surface cladding
wear behaviour of solid lubricants Ag and BaF_2–CaF_2 obtained by laser surface cladding, 145
Laser surface melting
laser surface melting of an austenitic Fe–26Mn–7Al–0.9C alloy, 139
Laser-Arc evaporation
Tribological characterization of hard carbon films prepared by Laser-Arc evaporation, 111
Lasers
wear behaviour of laser surface hardfaced steels with tungsten carbide powder injection, 123

Magnetic fields
magnetic fields in magnetron sputtering systems, 1
Mass spectrometry
mass spectral analysis of CVD processes, 91
MoS_2 films
microanalysis and modelling of tribological coatings, 163

Nickel electrodeposition
textural modifications in nickel electrodeposition under pulse reversed current, 71
Nitrides
laser gas alloying of titanium alloy with nitrogen, 191
Nitrogen doping
optimization of the contact mechanical strength of magnetron-sputtered nitrogen-doped AISI 316L physically vapour deposited coatings, 31

Orthogonal machining
action of gaseous lubricants in the orthogonal machining of an aluminium alloy by titanium nitride coated tools, 183

Physical vapour deposition
optimization of the contact mechanical strength of magnetron-sputtered nitrogen-doped AISI 316L physically vapour deposited coatings, 31
Plasma nitriding
plasma-nitrided α–β Ti alloy: layer characterization and mechanical properties modification, 19
Plasma spraying
thermal-shock behaviour of plasma-sprayed Al_2O_3–13wt.%TiO_2 coatings on Al–Si alloy influenced by laser remelting, 169

Plastics processing
tribological behaviour and corrosion performance of Ti–B–N hard coatings under plastic manufacturing conditions, 97
Pulse reversed current
textural modifications in nickel electrodeposition under pulse reversed current, 71

Solid lubricants
wear behaviour of solid lubricants Ag and BaF_2–CaF_2 obtained by laser surface cladding, 145
Sputtering
deposition of metastable aluminium–chromium alloys by r.f. magnetron sputtering from mixed-powder targets, 179
fatigue performance and tribological properties of r.f. sputtered TiN coatings, 43
fundamental properties and tribological wear behaviour of sputtered Cr–CrN coatings on light metals, 77
high current density triode magnetron sputtering, 105
magnetic fields in magnetron sputtering systems, 1
mechanical and tribological properties of titanium aluminium nitride coatings formed in a four magnetron closed-field sputtering system, 117
mechanical and tribological properties of titanium nitride coatings formed in a four magnetron closed-field sputtering system, 61
microanalysis and modelling of tribological coatings, 163
optimization of the contact mechanical strength of magnetron-sputtered nitrogen-doped AISI 316L physically vapour deposited coatings, 31
reactive unbalanced magnetron sputter deposition of polycrystalline TiN/NbN superlattice coatings, 13
Steel
formation and tribological application of CVD diamond films on steels, 197

Ti alloys
laser gas alloying of titanium alloy with nitrogen, 191
plasma-nitrided α–β Ti alloy: layer characterization and mechanical properties modification, 19
Ti–B–N coatings
tribological behaviour and corrosion performance of Ti–B–N hard coatings under plastic manufacturing conditions, 97
TiN coatings
action of gaseous lubricants in the orthogonal machining of an aluminium alloy by titanium nitride coated tools, 183
fatigue performance and tribological properties of r.f. sputtered TiN coatings, 43
mechanical and tribological properties of titanium nitride coatings formed in a four magnetron closed-field sputtering system, 61
TiN/NbN superlattice coatings
reactive unbalanced magnetron sputter deposition of polycrystalline TiN/NbN superlattice coatings, 13
Titanium
fundamental properties and tribological wear behaviour of sputtered Cr–CrN coatings on light metals, 77
Ti(Al)N coatings
mechanical and tribological properties of titanium aluminium nitride coatings formed in a four magnetron closed-field sputtering system, 117
Triode arrangements
high current density triode magnetron sputtering, 105

WC powder injection
wear behaviour of laser surface hardfaced steels with tungsten carbide powder injection, 123
WC–Co coatings
microstructure and hydroabrasive wear behaviour of high velocity oxy-fuel thermally sprayed WC–Co(Cr) coatings, 81
WC–Co tool inserts
a comparison study of diamond films grown on tungsten carbide cobalt tool inserts with CH_4 and CF_4 gas sources, 155
WC–CoCr coatings
microstructure and hydroabrasive wear behaviour of high velocity oxy-fuel thermally sprayed WC–Co(Cr) coatings, 81
Wear resistance
improved wear resistance of ceramics through the use of coatings, 51

Zinc coatings
tensile properties of zinc coated aluminium, 203
Zinc-coated copper
CO_2 laser treatment of zinc-coated copper, 173
